

2023-2024 Nova Scotia Examination

English 10

About the Examination

Students in English 10 courses wrote this examination in January or June 2024. For the reading portion of the examination, students read different types of texts and answered questions about what they read. For the writing portion of the examination students completed two writing tasks.

Nova Scotia teachers work with the Department of Education and Early Childhood Development to develop this examination, to score the writing tasks, and to set the expectation of the examination. The expectation is what students should know and be able to do at the end of the course. All of the items and texts on the examination are aligned with selected English 10 curriculum outcomes. Students' examinations were first scored by their teachers in order to incorporate the examination mark into their final course grade. The examination results contribute 20% to students' final course mark. The examinations were then scored at a provincial marking session to provide provincial results.

The examination results will provide:

- teachers with information to inform instructional planning;
- parents and guardians with information on their child's performance;
- the Department of Education and Early Childhood Development and Regional Centres/CSAP with information to inform educational decisions.

These results should be used in combination with other reliable measures of school and classroom achievement.
