Instructions to Students

General Instructions

This examination has two sections with the following suggested time allotment:

30 Selected Response Questions (Multiple Choice)	Value 30 pts (approximately 45 minutes)
8 Constructed Response Questions	Value 30 pts (approximately 1 hour, 15 minutes)

Maximum allotted time: 2 hours

Use these suggested times to guide you in the completion of the examination; however, you may not find it necessary to spend the suggested time on each section.

- Please use a pencil to complete the examination.
- Calculators are not to be shared.
- All work must be completed in the main examination booklet. Data sheets and scrap paper are provided in the *Formula Booklet*. Work completed in the *Formula Booklet* will not be evaluated.
- Diagrams are not necessarily drawn to scale.

Selected Response Questions

When answering a selected response question, read the question carefully and decide which of the given responses best answers the question being asked. Completely fill in the bubble next to your chosen answer **in the examination booklet**.

Example:

1. What is the sum of 2 + 2?

ⓐ 3
● 4
ⓒ 5
ⓓ 6

If you wish to change an answer, please ensure that you erase your first answer completely.

Constructed Response Questions

- Read each question carefully.
- Points are earned for correct work. Show all your work!
- When units are used in a question, it is expected that you include units in your final answer.
- When instructed to do so, round off as indicated in the question.
